

What?!

Yep. \$0 Stock Trades.

This month. Next month. Every month.

What's the catch?

There is no catch. We can give away free trades because the cost of executing a trade has become very low. And like other brokerages, we make money on interest income and options trades. To qualify for the free stock trades, simply maintain a net equity of \$2,500. Otherwise, it's just \$4.50 per trade. Pretty simple, right?
